# Playing for Real

How Maths Can Help You Win

**New Theatre Royal, Lincoln**  
Clasketgate, LN2 1JJ

**21st June 2019**

**10am–12pm**

**Tickets £9 (inc VAT) – teachers FREE.**

Inspire your **Year 9s and 10s** with a maths show that will captivate even your unenthusiastic mathematicians.

If you think games are just for fun, then think again. Games contain some of the most important maths you'll ever need in everyday life, from managing money to out-thinking competitors. In this feast of mathematical games our speakers will demonstrate the unlikely usefulness of probability, puzzles and percentages. You'll get a chance to play some games, and you could even win a prize.

It's the most important fun you'll have this year.

For more suggestions on how to make the most of this event visit our **TEACHER PAGE:**

## BOOKING

To provisionally book seats visit our website, at **[www.mathsinspiration.com/booking](http://www.mathsinspiration.com/booking)**. You are provisionally booked once we email you back, at which time we will give you the deadline for when you'll need to confirm your numbers and make your payment. We encourage you to pay by BACS, though we also accept cheque payments.

For full terms and conditions and more details on our events and speakers as well as tips for teachers, please visit our website.

A joint venture between **Maths Inspiration**  
and **The Advanced Mathematics Support Programme**

**Jennifer Rogers** studied Mathematics with Statistics at Lancaster University before going to the University of Warwick to do her PhD. She is now research fellow in the Department of Statistics at the University of Oxford. She has appeared as an expert statistician in the TV programmes Long Live Britain and Mystery Map - in which she calculated the chance of dying from spontaneous human combustion!

**Ben Sparks** is a mathematician and musician who travels the country demonstrating the beauty of maths. He's based at the University of Bath and still gets surprisingly emotional when playing with maths (whether that's playing games, playing guitar, or just playing for laughs). His favourite game is X-COM.

**Rob Eastaway** is an author whose books on maths include the bestselling *Why Do Buses Come In Threes?* and *The Hidden Maths of Sport*. He appears regularly on radio to talk about the maths of everyday life. He particularly likes games that involve a combination of strategy and chance – his favourite is *Perudo*.

## WHAT TEACHERS SAID ABOUT THE SHOW . . .

"Brilliant - Perfectly pitched!"  
**ASHFIELD SCHOOL**

"The whole show was brilliant! I got back in time to teach the last lesson of the day and I was really buzzing."  
**OUTWOOD ACADEMY, BARNESLEY**

"Seeing maths outside the classroom was invaluable!"  
**WALES HIGH SCHOOL**

"Students really enjoyed the games, and the participation was excellent."  
**WATH COMPREHENSIVE**
