

What's the pattern?

A, B, C and D form a pattern. But D has not been done yet.

1. How many white dots should D have to complete the pattern? And how many black?
2. What fraction of the dots in D should be white? And what fraction black?

A

B

C

D

Imagine pattern D. What percentage of it should be black?

A

B

C

Use squared or dotted paper to make up a puzzle like this for a friend to do.
