

you need:

- 0–9 dice
- pens or pencils
- calculator

Who's closer? for 2 players

First of all

To decide on the target number, roll the dice four times and write the numbers in the empty boxes under 'Target number'.

Decide who is Player A and who is Player B.

When it's your turn

Roll the dice once and write the number in one of your boxes.

You have two numbers to complete.

The end of the game

When both players have completed both their numbers, the game is over.

Each of you, choose one of your numbers (the one you think is closer to the target).

Use a calculator to work out whose is closer to the target number. That person wins.

Game 1

Target number
