

# Triangles & coordinates

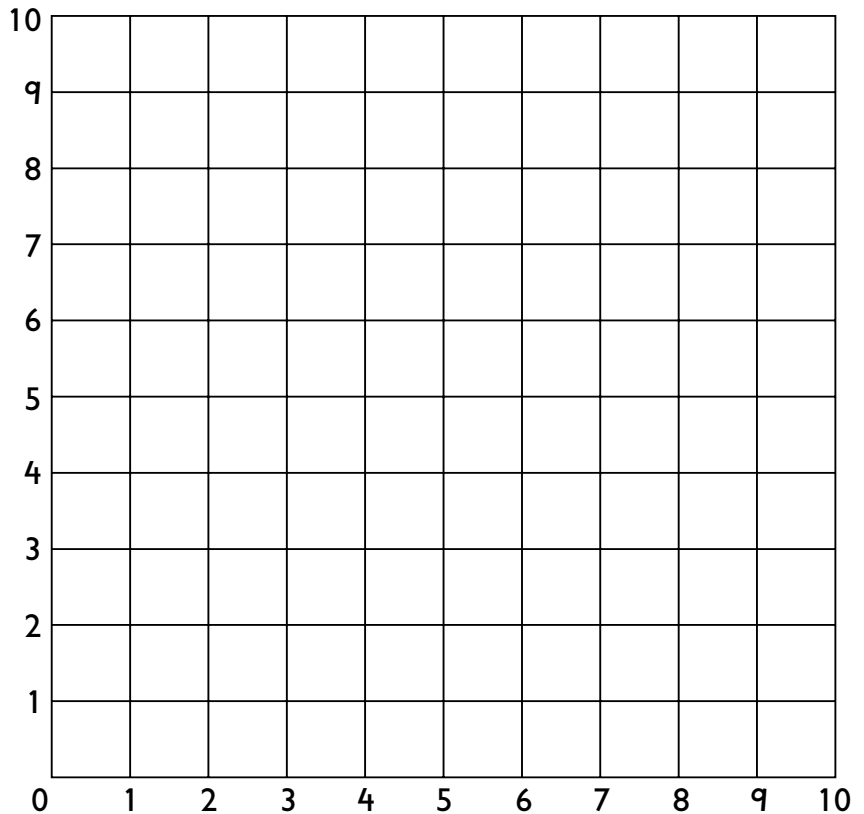

- 1 Shanti drew a right-angled triangle on this grid then she rubbed it out.

The corners were at three coordinate points:

(\_, \_) ( \_, \_ ) ( \_, \_ )

The numbers of the coordinate points were:  
2 2 3 3 5 9 (but not in that order)

Can you work out the coordinate points and draw the triangle?

- 2 Use this grid to make up a similar puzzle for a friend.

Try drawing a rectangle in pencil, very lightly, then rubbing it out.
