

50p coins problem

Molly's Grandma collects 50p coins.

On Saturday she gives Molly ten of these coins.

Molly puts the coins in her empty purse
and goes shopping.

She uses some of the coins to buy a book for £3.59.

How much change does she get?

Next she buys some stickers that cost 90p.

How much money has she left now?

Molly wants to buy a lolly for her little brother.

Lollies cost 60p.

Has she got enough money left to buy a lolly?
