

you need:

- counters in two colours

Three digits

 for 2 players**When it's your turn**

Put a counter on one of the number labels.

The end of the game

The first player to have three numbers which contain the same digit wins the game.

Play several games.

The first person to win five games is the overall winner.

Sample game

Jayshree chose these numbers and won the game – because they all have 8 in them.
