

## Background information for teachers

### Constructing keys – example of a simple key with six items

(see booklet, pages 33 and 34)

This image of a key made with liquorice allsorts is provided as an A4 version - you can either download it and print it for children to use as a guide or you may wish to view an enlarged version of it, say using an interactive whiteboard. Remember, it is intended to give ideas and help children understand how to construct a key rather than be something to be copied.
