

Health and social care professionals often work with people with disabilities. Careful planning of space creates better access for all.

- Are the corridors wide enough to allow **wheelchairs** to pass each other?
- Are there any corners which may be difficult to steer wheelchairs around?
- Are there any hazards for **wheelchair** users?

How easy is it for someone in a **wheelchair** to get from the school entrance to your classroom?

Are there any steps which will need ramps?

*Slope should be 5% (1 in 20) and not more than 9 m long.*

Write a report about any suggested changes.
