

How quickly can you build a warehouse?

Your task is to plan how to build a warehouse in the shortest time possible.

There are various jobs that must be done.

Some jobs must be done before others – put the cards in order.

The length of each tile shows how long each job will take to complete.

If you add up all the times, it comes to **25 weeks** but some tasks can be taking place at the same time. **Find the shortest solution.**
