

# srt 5c Modelling appearance

strategy  
resource  
task 5c

The client organises  
themed parties

He wants making the  
party hat to be a sort of  
game that people play at  
the party

He thinks that party  
hats to reflect the theme  
would be a good idea

So the hats have to come  
in several pieces that  
somehow fit together

To keep the hats cheap  
they will be made from  
coloured paper

For each theme  
there will be several  
different hats

## L Learning

To develop design ideas through  
2D modelling

## Student's Booklet

Developing design ideas  
pages 1 and 2

## Timing

60 minutes

## Equipment and materials

- workbook
- pen, pencil
- squared paper
- ruler
- coloured markers
- craft knife
- scissors
- safety ruler
- cutting mat
- glue stick
- double-sided adhesive tape

## Type of task

New

- 1 Sketch several different designs from the description above.
- 2 Choose the one you think looks most attractive/intriguing.
- 3 Develop this sketch into a 3D model using coloured paper.

## Further/homework

Use the Internet to make a collection of images that could be used for party themes. Arrange them into a display which you can use for future reference
